

# *The abandoned house in the woods*

*by  
Keld Jensen*

## *The abandoned house in the woods*

*In the middle of the great forest stands a house. The house is abandoned. The windows are blinded with wooden boards.*

*A related piggery stands empty. The door to the piggery is open. It hangs in the hinges and most of the windows in the piggery are broken. There is no longer people and livestock in the house.*

*Behind the piggery by a dense scrub is a red woodshed. The shed is even more battered than the main building. I think it has been a henhouse or a pigeon house. Parts of the roof have already collapsed and almost all the windows are broken. The forest will soon take over. The surrounding scrub already creeps in by the cracks of the shed.*

*All photographs are taken in the wood Rold Skov in Denmark in December 2014.*
